

## MAD PE9/10

### *Dance Notations*

Assigned: Nov 8 - Due: Nov 10

Name: \_\_\_\_\_

#### What we're learning:

This assignment is about being able to not only capture ideas for dance moves that you may come up with, but to be able to pass on those moves to others, individually and in groups.

#### Step 1:

create a series of drawings that explain a three-step dance move. Teach it to someone else without verbalizing instructions!

The pictures should be enough. If there is confusion, go back and redraw what doesn't make sense and try again.

*\*It's like Win, Lose or Draw- where the drawing is the only way to teach someone*

#### Step 2:

form a group of three people and have each of you try and follow the instructions you've made. You aren't teaching it- they are trying to follow it.

	Exceeding	Proficient	Developing	Emerging
You have learned and demonstrated a variety of movement concepts and strategies for: games, dance, rehearsal and performance (9/10)	You have been able to create your own symbols to teach others dance moves, <b>re-drawing them</b> when they don't understand	You have not been completely successful in creating a working set of notations	You have a number of notations that are not clear enough for others to learn the dance	You have either not completed the work, or there are too many errors in your notations for it to work as a teaching tool
